## *Cielo Celeste Farm*

---

January 15, 2008

This is in response to MY writing the WSPA about the random importation of the gypsy horses into the USA causing the problems we ALL know too well.

They referred it to the humane society, who referred it to several societies. Two of which are the Cob and Drum and the Cob Society whom I shall personally SEND this to and know the GCSA will respond on the issue at hand. The stories I have been hearing which come from friends of the victims and directly from victims of these PONY mills are horrific!

If it is just me and myself and I, I am perusing this as much as I can to help save the breed! Vanner/Cob, damn it-we are GYPSY owners and we must cull these herds and STOP random importation. It actually is now too late, but we can start somewhere and must. Sending letters to the enclosed societies may jump start something. The killers soon will be taking in the horses due to the poor things imported and sold at ridiculous and un-fair prices to unsuspecting buyers.

Sincerely,

*Celeste Huston*
